123RFID Mobile: Writing Inventorized RFID data to a File.

This article describes how to save inventoried RFID data to a .CSV file using 123RFID Mobile version 1.0.1.58 or newer.
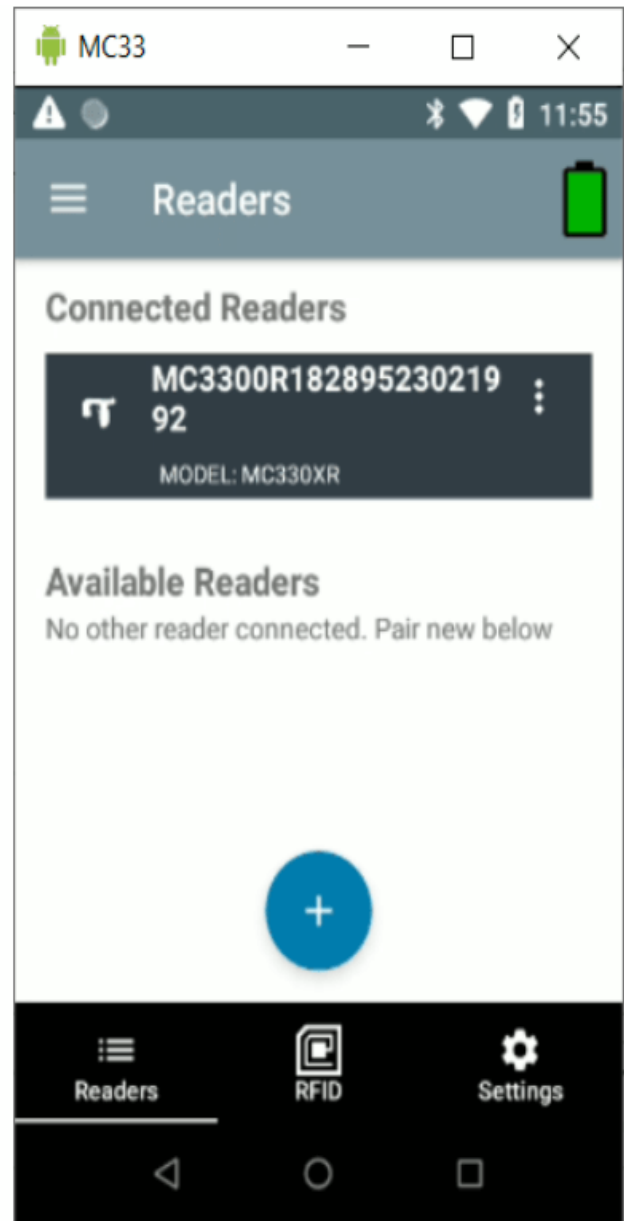

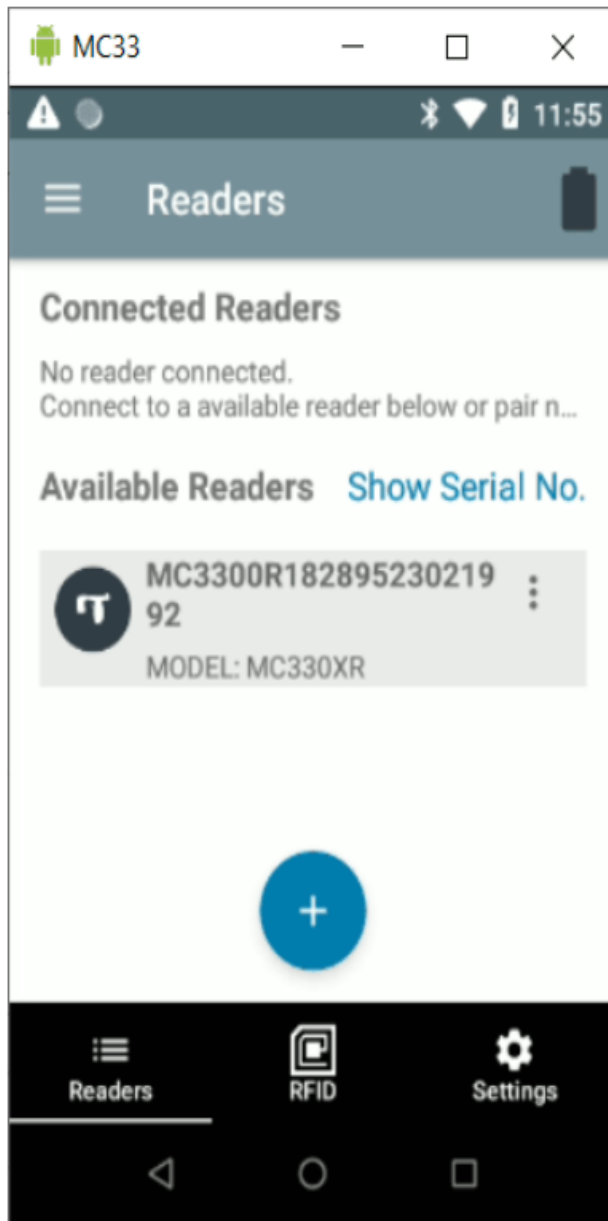

Issue / Question

How to save inventoried RFID data to a .CSV file?

Procedure:
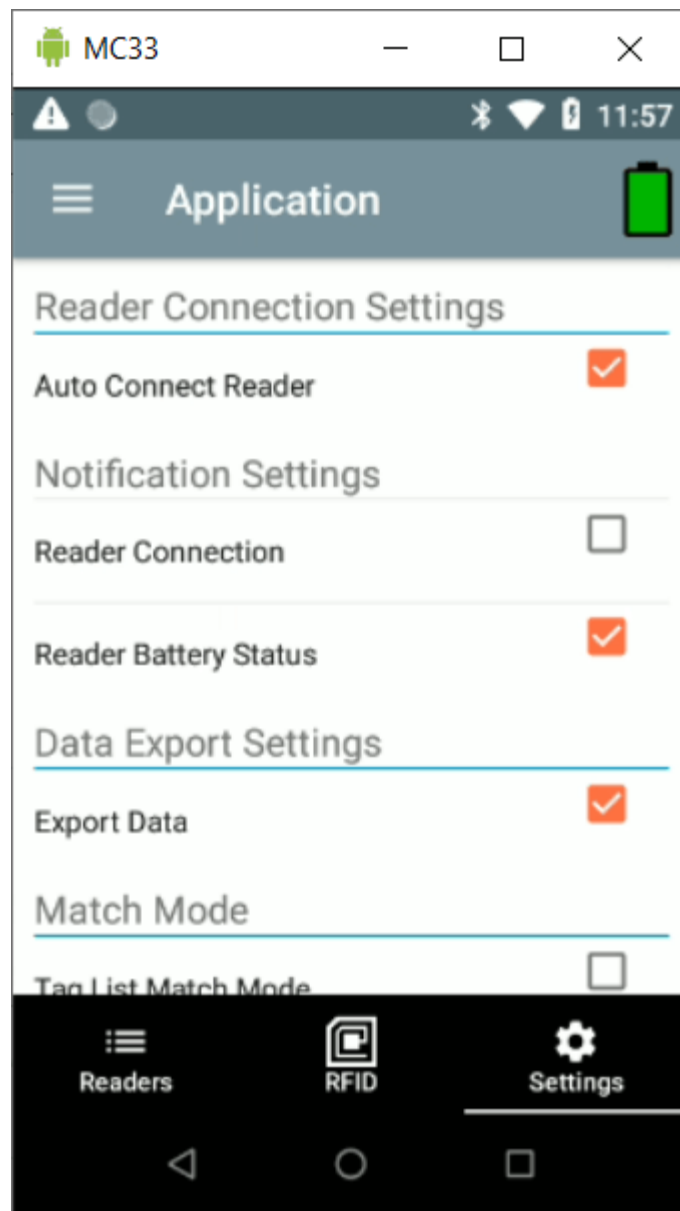

1. Open **123RFID Mobile** from the app drawer.

2. **Connect** to the RFID reader.

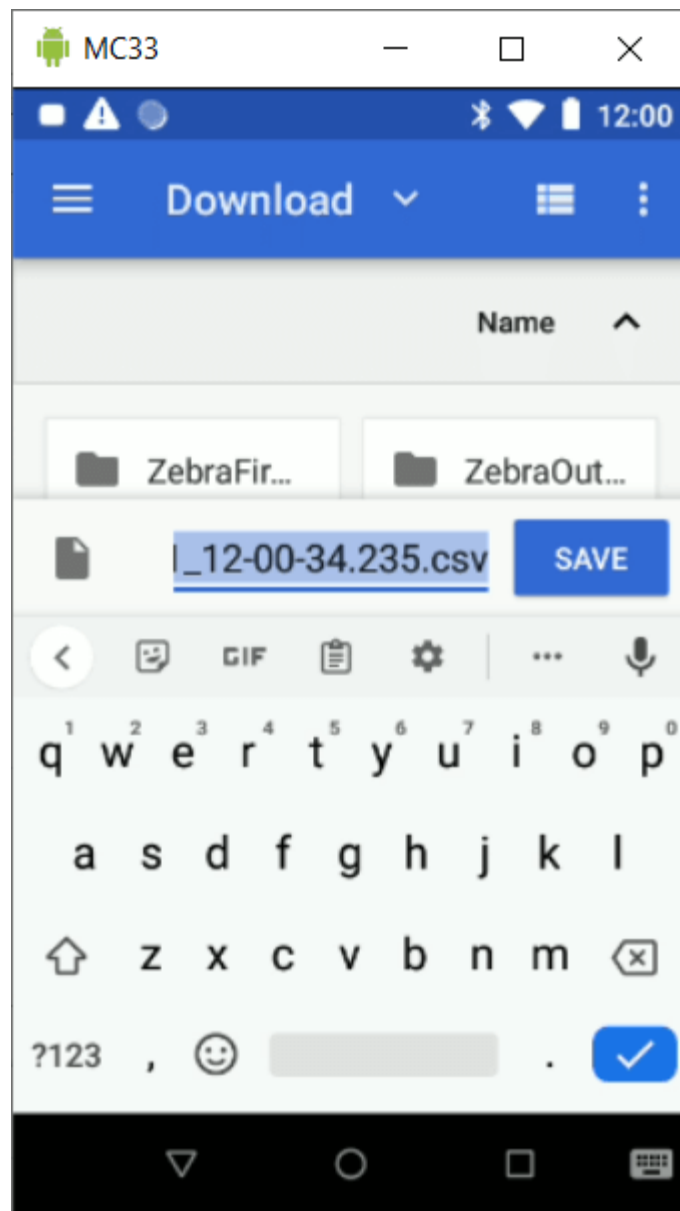

3. Navigate to **Settings** > **Application**

4. Under **Data Export Settings,** enable **Export Data** *(Box Checked)*
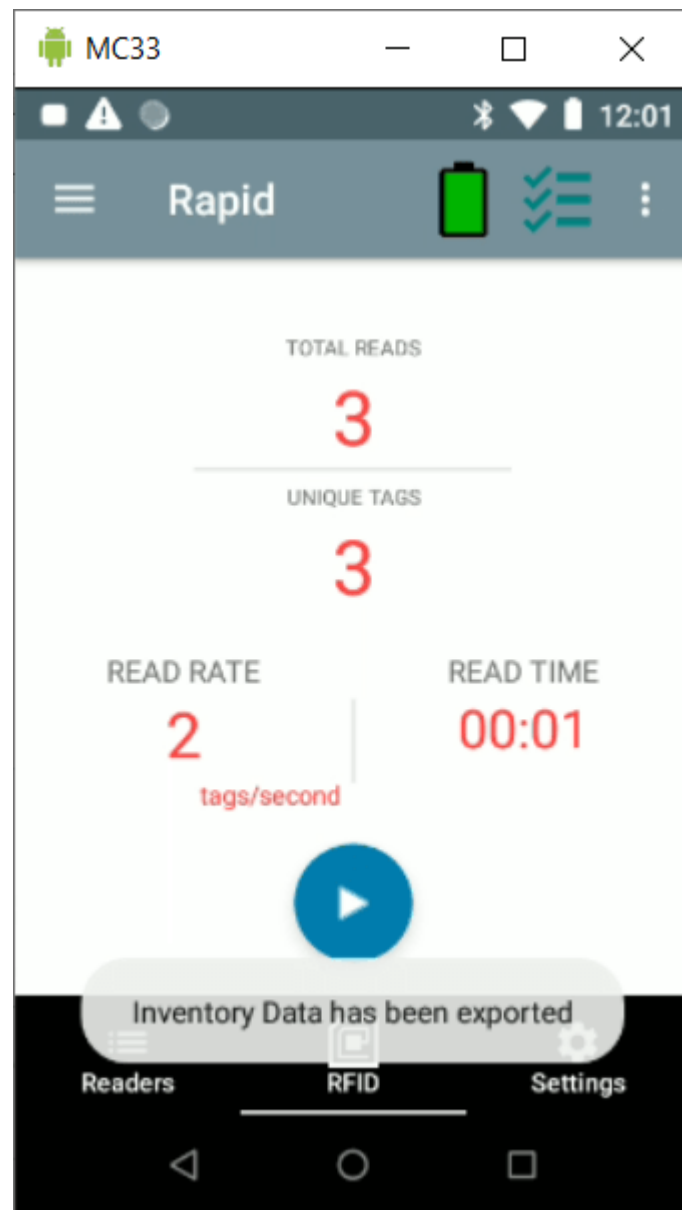

5. Go back to the **RFID** screen and **start** reading tags.

6. Once you **stop** reading tags, you will get a prompt to **save the results** to a file.

7. Tap **save**. A brief message will appear **Inventory Data has been exported.**

8. By default, files are saved in the **Downloads folder.**

9. These **.csv files** can be transferred to a computer. (Upload onto the drive)
